MEXICO'S MINING POTENTIAL

More than 70% of the country's territory is geologically suitable for the development of mining projects.

Mexico has well defined mineralized belts and metallogenic regions:

-  Mining clusters
-  Fluor
-  Gold, silver and copper
-  Massive sulfides: gold, silver, zinc, copper and lead
-  Strontium
-  Manganese
-  Iron
-  Copper, molybdenum and gold
-  Zinc, lead, silver and copper
-  Phosphates
-  Coal

MEXICAN MINING EXPORTS

In 2015 the Mexican mining exports reached a value of **14.6 billion USD**.

PRODUCTION BY MINERAL

(percentage of the value of total production in 2015)
In 2015, mining production in Mexico reached a value of **10.7 billion USD**.*
